A Note from Our PVHS School Nurse

As we head into the fall season, this is a quick reminder to be mindful of the beginning of cold and flu season. It is important that we work together to keep our children healthy. If possible, you and your child should get a flu shot to help prevent infection with the flu. Viruses/Common Colds spread easily among children in schools, and families with school-age children have more infections than others. By keeping our children flu-free, we benefit the community as a whole. [Click here for useful information for when your child does get the flu.](#)
