PLANNING COLLEGE VISITS!

Many sophomores and juniors are now in the early stages of their college journey and are interested in exploring universities as summertime fast approaches. The upcoming season is a very popular time for campus visits, and with good reason! Here are some tips to help students as they navigate their visits.

- Book early! Spots fill up quick for the summertime, so right now is a great time to check the websites of institutions you are considering to visit as summer schedules may be live now and ready for booking.
- Know why you're going. **It's useful for students to self-reflect and understand what motivates them to visit specific institutions.** Are they looking to get first impressions? To seriously consider if this school is right for them? To talk to students and faculty? It's important that they plan accordingly to make the most of their visit. Please do not plan on visiting only "dream" schools. It's important to look at strong target schools as well.
- Come prepared with questions - like these! Students may be a little nervous during visits or unsure what to ask, so check out the link to see a few questions prepared by the University of Pennsylvania to help get them started!
- Take notes during the visit. Visits can all blur together, so it's good for students to come prepared with some way of recording their thoughts. Their future selves will thank them!
- Can't go in person? That's alright, many schools offer virtual tours and info sessions.

Bonus Tip! The University of Pennsylvania has an upcoming Planning a College Visit webinar that will offer additional tips and take a deep dive into how

students can make the most of their time on a campus. With these tips, students and their families should be ready to meaningfully explore their institutions of interest.

E-Vehicle Safety

Please follow these safety guidelines when operating an e-vehicle (including electric bikes, scooters, and skateboards) to protect yourself and others!

WEAR A HELMET!

California law requires anyone under 18 to wear a properly fitted and fastened helmet at all times while riding an e-vehicle.

FOLLOW TRAFFIC LAWS

E-vehicle riders must follow all traffic-related laws, including stopping at traffic lights. Be aware of road hazards and pedestrians while riding.

FOLLOW THE SPEED LIMIT

The speed limit for e-bikes is 20 MPH, and the speed limit for e-scooters is 15 MPH. Be sure to abide by these speed limits at all times.

REQUIREMENTS FOR E-BIKES

In order to qualify as an e-bike, your e-vehicle must have fully operable pedals. If pedals are not present, it is considered a motorcycle, and riders must be 16 years of age or older with an M1 license. E-bikes must also have a sticker advertising of class one, two, or three; maximum speed; and watts, permanently affixed by the manufacturer.

PASSENGERS AND ATTACHMENTS

Carrying a passenger is **NOT** permitted. In addition, attaching the e-vehicle to yourself or another vehicle while on the road is forbidden.

E-SCOOTERS

In order to ride an e-scooter, you must have a driver's license or instruction permit. An e-scooter does not include motorcycles, motor-driven cycles, or motorized bicycles and mopeds.

PARKING YOUR E-VEHICLE

If you park your e-vehicle on a sidewalk, it cannot impede pedestrian traffic and should be positioned to allow for a clear path. Parking on a PVPUSD campus requires a permit. While on campus, you must walk your e-vehicle to the designated parking zone.

CARRYING ITEMS

It is **illegal** to carry any package or item that prevents you from keeping at least one hand on the handlebars while riding an e-vehicle.

MOTOR POWER LIMIT

E-vehicles must have a motor power of **less than 750 watts**. A permit is required for any e-vehicle exceeding this limit.

OPERATING UNDER THE INFLUENCE

Operating an e-vehicle while under the influence of alcohol or drugs is **illegal** and can result in a DUI charge.

YOUR E-BIKE CAN BE IMPOUNDED!

Under the law, your e-vehicle can be **impounded** for any of the following reasons:

- Riding without a license
- DUI
- Traffic obstruction or safety hazard
- Abandonment

PALOS VERDES PENINSULA UNIFIED SCHOOL DISTRICT

What Classifies as an E-Bike?

CALIFORNIA E-BIKE CLASSIFICATION CHART

California classifies e-bikes into three categories based on speed and throttle. Please review the chart below to ensure your child is adhering to the correct requirements based on their e-bike classification.

Class	Max Speed	Throttle Allowed?	Pedal Assist?	Age Requirement	Helmet Required?
Class 1	20 mph	No	Yes	No minimum age	Under 18
Class 2	20 mph	Yes	Yes	No minimum age	Under 18
Class 3	28 mph	No	Yes	16+ years old	Required for ALL riders

WHAT IS NOT AN E-BIKE?

Street illegal electric motorcycles—including Surrons, Talarías, E-Ryde Pros and many other brands—are NOT e-bikes.

Too Powerful: E-bikes are legally limited to 750 watts. Electric motorcycles can have 6,000+ watts, making them as powerful as gas motorcycles.

Speed: E-bikes have speed limits of 20-28 mph, while electric motorcycles can hit 50+ mph, making them illegal for bike paths, bike lanes, and most public roads.

No Pedals: E-bikes must have functional pedals. Electric motorcycles run entirely on a throttle, like a dirt bike. However, electric motorcycles that exceed speed and power limits are not classified as e-bikes, even if they have pedals.

License & Registration Required: Because they exceed e-bike regulations, electric motorcycles require motorcycle registration, a license, and insurance to be legal on the street.

Supervise: It's possible that your child has heard of ways to modify the settings of their e-bike to exceed the intended maximum speed. We suggest occasionally testing the bike to ensure it has not been tampered with.

WHY DOES IT MATTER?

- ☒ Riding an electric motorcycle on the street without registration is **illegal** and can result in tickets, fines, and bike impoundment.
- ☒ Electric motorcycles are **NOT allowed in bike lanes or on trails**.
- ☒ Electric motorcycles require **motorcycle-level safety gear, including a DOT-approved helmet**. Crashes at these speeds can be severe.

If you thought your child was riding an e-bike, but they're actually on an electric motorcycle, it's time to review the laws and safety concerns. These are NOT the same as e-bikes, and they come with bigger risks and legal responsibilities.
