National League of Young Men, Inc. (NLYM) is a mother and son organization structured around a four-year unique experience for young men in grades 9-12. Our goal is to provide young men with opportunities to contribute to their communities and to enhance the mother-son relationship.

Each year, our Young Men donate nearly 60,000 hours to over 1,000 local and national non-profit organizations across the country. They gain invaluable service experience that will carry with them as they continue to make positive impacts on their communities. NLYM is committed to being an organization that represents and cultivates compassion for all people in the communities in which we live and serve.

NLYM is a growing national organization with new chapters forming from coast to coast.

Currently a chapter is forming in the Palos Verdes Peninsula & South Torrance area and is seeking mothers with sons entering 8th, 9th and 10th Grades who reside in the Palos Verdes Peninsula and South Torrance area.

Our organization is 100% powered by volunteer mothers and young men in high school. We create valued relationships with local non-profit organizations that make life better in our communities and give our Young Men a wide variety of service experiences. We invite local leaders to share their experiences and wisdom with our Young Men. We participate in horizon-expanding cultural experiences and events. Our Young Men are introduced to the art of being a gentleman and the importance of treating others with respect.

NLYM's four-year experience focuses on different aspects of leadership, service, protocol, and culture each year. Our program is designed to help Young Men develop confidence and courage as they lead each other and learn together. We offer our Young Men relevant and profound experiences that reveal the great joy of serving others.

At the end of four years, our Young Men are well-rounded individuals who have developed compassion, important leadership skills, and polished manners.

NLYM is committed to promoting inclusivity and is a non-political, non-religious organization.

Scoliosis Awareness

What is Scoliosis?

Scoliosis is a condition where the spine curves and twists to the side instead of growing in a straight line.

Why Teens Should Be Aware

- Research shows a MUCH higher percentage of dancers may have scoliosis compared to the general population
- Scoliosis is more common in girls than in boys
- Scoliosis can occur suddenly in kids ages 10-16 during a growth spurt. (sometimes younger)

Awareness helps teens stay informed.

Why Early Detection Matters

- More treatment options
- Better monitoring during growth
- Helps support injury prevention

Many athletes can continue their sport fully and safely. **Early detection often means observation and guidance, not extreme treatment.**

Important to Know

- Scoliosis is not caused by bad posture or carrying heavy backpacks
- Many cases are idiopathic (no known cause)
- Having scoliosis does not always mean that you must stop your sport

If You Notice Signs

Talk with a parent, guardian, or healthcare provider. A medical professional can decide if further evaluation is needed.

The flyer is for educational purposes only and does not provide medical advice or diagnosis. Self-diagnosis and misdiagnosis can delay proper diagnosis. Scoliosis only a qualified medical professional can diagnose or recommend treatment.

SCOLIOSIS IN CHILDREN & TEENS

Luskin Orthopaedic Institute for Children is not related to, sponsored by, or endorsed by the Palos Verdes Peninsula Unified School District.

Nearly 3% of the U.S. population has been diagnosed with scoliosis. When treated correctly, children can lead **healthy, active, fulfilling lives.**

WHAT IS SCOLIOSIS?

Scoliosis is a medical condition defined by a sideways curve of the spine, typically forming a "C" or "S" shape. It can be hereditary and appear in infancy, or develop during puberty as growth spurts occur.

SIGNS & SYMPTOMS

Each child may have a unique combination of these symptoms. Look for:

- One shoulder blade sticks out noticeably more than the other
- Ribs protrude more prominently on one side
- Tilted or uneven shoulders — may make clothing appear crooked
- Uneven waistline or hip bone, which can make pant legs appear uneven
- Head does not appear centered with the rest of the body

QUESTIONS EVERY PARENT ASKS

- Will my child need surgery?**
Most don't — over 75% never need surgery. Many cases are managed with monitoring or bracing alone.
- How long do they need a brace?**
Usually 12–24 months, and often only at night, depending on severity and growth stage.
- Do braces really work?**
Yes — bracing stops progression in 80%+ of kids. Our custom braces allow comfortable, flexible movement.
- Will the curve get worse without treatment?**
It often does during growth—but early care like monitoring and bracing keeps most curves mild and manageable.
- Can my child still play sports?**
Yes. Almost all sports are encouraged. Physical activity is healthy and generally not restricted.
- What types of scoliosis do you treat?**
All types — idiopathic, congenital, and neuromuscular scoliosis. We tailor treatment to each child's specific needs.
